

INSTALLATION INSTRUCTION FOR MAC USING XAMPP

1. Install XAMPP: <https://www.apachefriends.org/index.html>
2. Copy/extract Open Enventory into Applications/XAMPP/htdocs/. Write down the folder name because this will be the web address. In this case the folder is named 'open_enventory'

3. Open Applications/XAMPP manager. Start MySQL and Apache.

4. Change mysql root password by following these steps:
 - a. Ensure that the MySQL/MariaDB server is running. (see step 3)
 - b. Open a new terminal.
 - c. Use the mysqladmin command-line utility to alter the MySQL/MariaDB password, using the following syntax:

```
mysqladmin --user=root password "newpassword"
```

- d. The *mysqladmin* command-line utility is located within the *bin/* subdirectory of the XAMPP installation directory, typically */Applications/XAMPP*.
- e. For example, to change the MySQL/MariaDB root password from its default empty value to the password *gue55me*, you would execute:

```
/Applications/XAMPP/bin/mysqladmin --user=root password "gue55me"
```

- f. Or, if a password has already been previously set and you'd like to change it to a new one, you can use the following syntax:

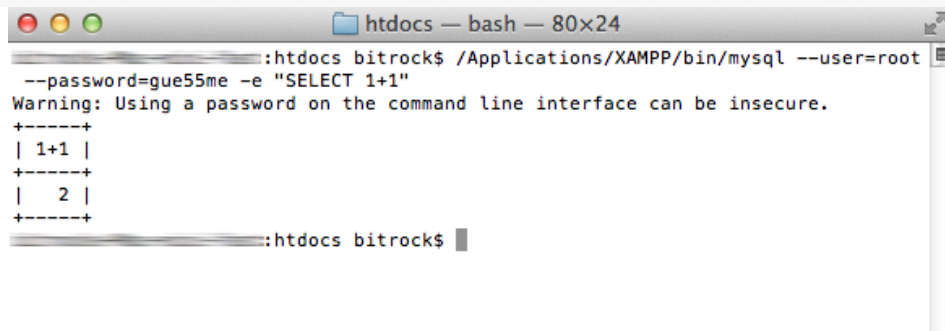

```
mysqladmin --user=root --password=oldpassword password "newpassword"
```

- g. For example, to change the root password from *12345* to *gue55me*, you would execute:

```
/Applications/XAMPP/bin/mysqladmin --user=root --password=12345  
password "gue55me"
```

- 5. Test that your password change has been accepted, by attempting to connect to the MySQL/MariaDB server using the *mysql* command-line client in the same directory. For example, you could use the command below to connect to the server and return the results of a calculation: (make sure you use your own password instead of "gue55me")

```
/Applications/XAMPP/bin/mysql --user=root --password=gue55me -e  
"SELECT 1+1"
```

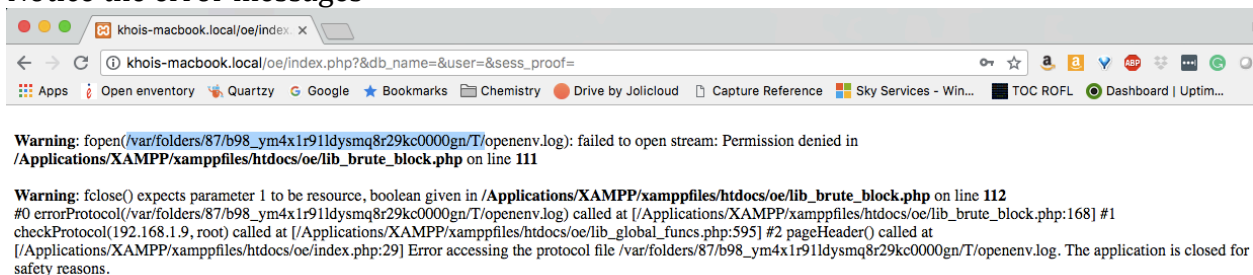

Steps 6 & 7 are for phpmyadmin set up. They are optional. You don't need to do this if you just want to set up Open Enventory

6. Change the permission for Applications/XAMPP/xamppfiles/phpmyadmin so that *you/your_account* have the read and write access, through right click, Get Info (or Cmd-I)

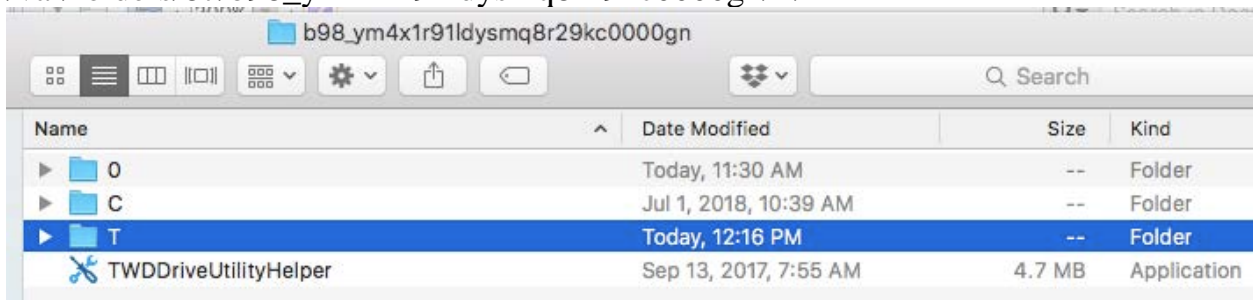

7. Use TextEdit to edit file config.inc.php. Locate
`$cfg['Servers'][$i]['auth_type'] = 'config';`
and change to:
`$cfg['Servers'][$i]['auth_type'] = 'cookie';`

8. Using a web browser, go to:
http://localhost/open_inventory/
In Database: put in the name for your database server
Log in with username 'root' and set password
Notice the error messages

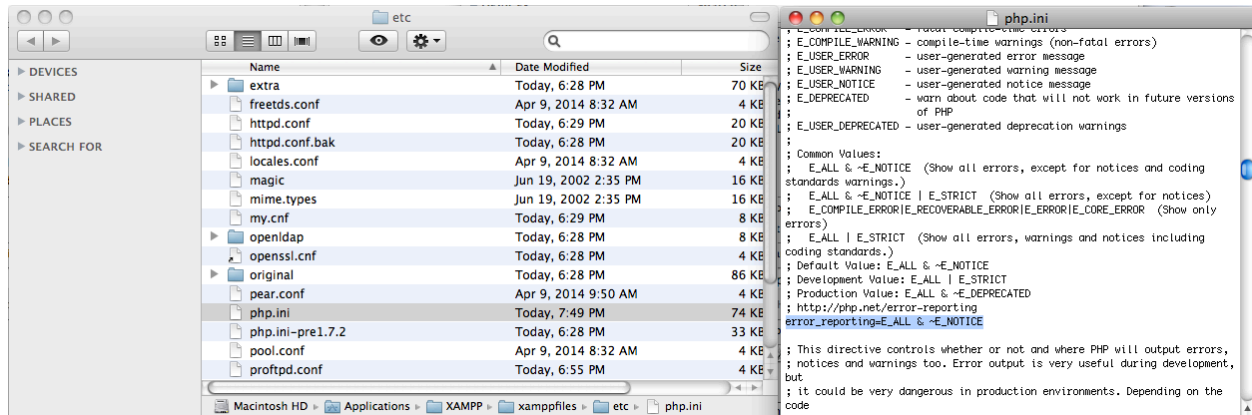

9. Under Warning above notice the place of the temp folder (in this case /var/folders/87/...)

10. Go to that folder containing the openenv.log (in this case: T with the path as following in Finder (file maybe hidden):
/var/folders/87/b98_ym4x1r91ldysmq8r29kc0000gn/T/

11. Set permission for everyone to Read&Write for this folder (e.g. "T")

12. Look-up file php.ini. Should be in Applications/XAMPP/xamppfiles/etc/

And change to:
 error_reporting=E_ALL & ~E_NOTICE

13. Restart Apache and SQL in XAMPP manager

14. Restart the web browser and go the server website at

http://localhost/open_inventory/

In Database: put in the name for your database server

Log in with username 'root' and set password

CHANGE TIME ZONE

1. Edit php.ini with TextEdit

/Applications/XAMPP/xamppfiles/etc/php.ini

Change:

date.timezone=Europe/Berlin

to:

date.timezone=America/Chicago

2. Restart server

CHANGE LOGIN DEFAULT DATABASE TO NONE

1. Edit lib_global_funcs.php with TextEdit

/Applications/XAMPP/xamppfiles/htdocs/open_inventory/

Change:

```
if ($db_name=="") {
```

```
    $db_name="storage";
```

to:

```
if ($db_name=="") {
```

```
    $db_name="";
```

2. Restart server

SAVE/ BACK-UP DATABASE

1. In Terminal window:

```
/Applications/XAMPP/xamppfiles/bin/mysqldump -u [user] -p [database] >  
[Path]/[backup_filename].sql
```

Replace **[*italic_text*]** (including the square bracket) with specific info.

2. Type in password and then Enter (nothing will show when you are typing the password)

REBUILD DATABASE ONTO A DIFFERENT SERVER

1. Install XAMPP
2. In Terminal window:
