

Changing User Password

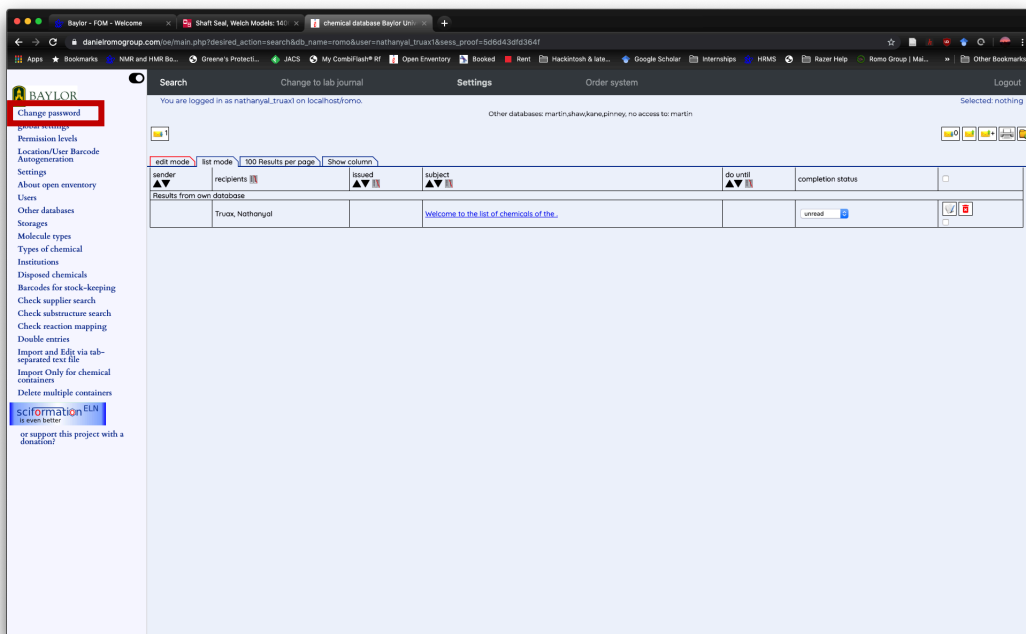

First, open up Open Inventory by going to danielromogroup.com/oe
Your screen should look as follows.

After logging in you should see the general window for searching chemicals.
Click on the "Settings" tab top and center of the page (I have outlined it with a red box below).

This will change the left side bar. At the top of the left side bar you should see "Change password" Click here (the button is outlined with a red box below).

Your screen should have two boxes as shown below. Fill in both boxes press the “Change password” button right next to the text fields and your password has been changed.
